# Research Proposal of Floridian Purchases of Greek Themed Toys

Brian Dodd

## Research Proposal of Floridian Purchases of Greek Themed Toys

TOYS 'R' US

Toys R Us ("TRU") was founded in 1948 by Charles Lazarus after his return from World War II (Biron and McDowell, 2022). TRU has seen a resurgence in its business in the last few years by opening mini stores inside larger stores including Macy's (Biron and McDowell, 2022).

TRU sells toys, books and educational and entertainment merchandise for kids and families. TRU, popular worldwide (Toysrus.com, 2022), sells other manufacturers' toys and merchandise (Toysrus.com, 2022. The cartoonish and comedic mascot (literally a giraffe named Geoffrey) reminds anyone of the educational and fun characters a consumer might find at a Chuck E. Cheese restaurant. TRU partners with manufacturers of toys, toy brands and merchandise organizations to stay open for business. (Toysrus.com, 2022).

Although they only operate locations in the U.S., Tru Kids, Inc. owns the TRU brand internationally (Wikipedia.org, 2022). TRU closed its two remaining, brick and mortar stores in January 2021. The brand struggled to make a comeback which included partnering with Amazon to fulfill its orders. Under its parent company Tru Kids Brands, in 2019 TRU relaunched its website and a few, small ground stores (Biron and McDowell, 2022).

TRU's annual sales is $438,491 (Gale, 2022).

## Research Question

Will Florida consumers purchase a new line of Greek themed toys?

Opportunity: Purchases of a new Greek-themed toy line may cause a significant increase in TRU revenue. Therefore, there is a size potential of specific consumers in the Florida toy market.

TRU may experience an increased sales revenue and notoriety, by offering consumers to purchase a new toy line depicting Greek mythos. Our research group believes consumers enjoy classic Greek stories of gods and heroes. However, only methodological research can reveal empirical data that may potentially suggest increased sales and any potential success of the toy line. Our research group will address, through research, how purchase and direct involvement with Greek story-themed toys may potentially increase TRU brand recognition, revenue, and consumer satisfaction.

The opportunity is important because it will:

1. Provide statistics and data revealing sales and revenues surrounding Greek-themed toy lines,
2. Locate solid data from databases and existing market analyses and literature reviews to be used toward discovering the potential viability of a new Greek-themed toy line,
3. Provide consumer purchase data in a specific location (Florida), especially consumers' purchases of Greek themed toys, and
4. Potentially provide TRU with knowledge of Greek mythos.

## Background Research / Literature Review

The research and discovered data should answer what the size of specific, potential, Florida consumer market is specifically for purchases of Greek themed toys.

In Florida, $22,240,000.00 was spent in year 2021 on dolls, toys, and games manufacturing. This revenue rose to $22,590,00.00 in year 2022. This revenue is predicted to increase to $23,160,00.00 in year 2023 (Statista, 2022). Florida toy manufacturers show a significant increase in revenue from year 2021 to 2022, with thousands of dollars predicted increase in year 2024; thus it is valid and reliable TRU should potentially develop and sell new toys aimed at Greek-themed stories.

Major toy brands include Hasbro, Mattel, and Disney. Disney's revenue includes sales of existing Disney-branded toys (Products), some of which are Greek-themed (Hercules animated movie and toy products). Its entire revenue saw 50 billion dollars in fiscal year 2021 in Disney's Media and Entertainment operating segment (Statista, 2021). Disney's Products and its Entertainment segments work together to generate more buzz, interest and sales of Disney services and offerings.

Parks and resorts were the second-largest revenue source. This segment generated a total of 16.97 billion U.S. dollars. It is a very successful segment; Disney's parks take places 1 to 9 in the ranking of the most visited amusement and theme parks worldwide. The Magic Kingdom Park in Bay Lake, Florida, ranked first in 2015 with 20.49 million visitors. You probably know Disney's theme parks have toy and merchandise shops along its sidewalks. Consumers will travel and stop into these shops to look and purchase items. Parks and resorts were the second-largest revenue source, generating a total of 16.97 billion dollars for Disney in year 2021 (Statista, 2022). The Magic Kingdom Park in Bay Lake, Florida has toy / merchandise and stand-alone shops within its vast venue. Here consumers can purchase Disney toys, including Disney's Hercules apparel, plushies, posters, miniatures, figurines and other items from the toy line. Disney's Hercules toy ling is based from its animated movie which has Greek / Grecian them and stylings. Disney's Parks, Experiences and Products segment – which includes sales of Disney-branded toys (e.g., Hercules toy line) – had revenue of $17 billion in 2021 (Statista, 2022). In 2022, Disney announced $1.2 billion in the first quarter. This revenue is up 64 times its net income in the prior 2021 quarter (Johnston, 2022). Some of that income comes from popular media and arts Disney sells, including its different toy lines such as its Hercules toy line.

Thus, having a successful, new Greek-themed toy line, not spun from a movie, may lead to other types of products spun from the toy line (e.g., Greek themed clothing apparel).. Thus, more research and samples suggesting whether or how deeply Floridians want to identify with the heroes, villains and gods of Greece's best common legends and mythologies. Or, if the new toy line is spun from an existing merchandise such as a movie, show or other successful, popular product, the branded toy line may or may not have greater chance of success, as my research may reveal. A year or two of fiscal and revenue success does not necessarily, predictably determine the ongoing success of any company, product, or set of products over a long period of time. For example, TRU saw closure of all its brick-and-mortar stores, but it successfully managed to stay open for business with long-term prospects.

In 2022 hundreds of Florida cities had families' parents who purchased toys and toy products, for their offspring. Some toys were educational or entertainment toys, including videos for kids to watch; purchased to provide education and entertainment (Bartleby, 2022). While kids just want cool playthings to pacify their time, they and their parents are targets for toy firms (Bartleby, 2022). The term toys may include a wider array of merchandise known as 'toys', such as possibly apparel or other toy products depicting Grecian branded logos, colors, styles, themes, words, and characters taken from Greek mythos, history and legend. Parents and kids are not the only Floridians who purchase Greek themed toys, there are collectors and hobbyists who also collect specific brands of toys, games, and even storybooks.

2022 Consumer Expenditures state that on average a Tampa, Florida family spent $133.96 on Toys, Games, Arts and Crafts, and Tricycles (Gale, 2022). And yet, video game (and hardware / software) sales were $286.82 (Gale, 2022). A toy line, in modern society, no longer just includes plastic or wood-made toys. A new Greek-themed toy line may include development of a video game that complements the toy figurines, and / or include a board game that interacts with digitally educational or entertaining apps and software. These electronic goods may be purchased as a set with a toy or sold separately in the toy line for consumers to 'collect them all'. Looking closer at Florida; Miami, Florida, 2022 household consumer expenditures were greater than Tampa consumers for Toys, Games, Arts and Crafts, and Tricycles, averaging $137.33 (Gale, 2022). 2022 Consumer Expenditures (Average Household Annual Expenditures) in Fort Lauderdale provided 137.39 averaged consumer purchases of the same (Gale, 2022). Average household spending is $139.85 in 2022, in Jacksonville, of the same products (Gale, 2022). Orlando's average household expenditure in 2022 is $141.48 for the same section of products. Port St Lucie's average household expenditure in 2022 is $140.58 for toys, games and similar.

Florida consumers spent on average $134.47 on toys, games, arts and crafts, and tricycles (Gale, 2022). In addition, Florida consumers on average spent $34.02 on books not purchased through book clubs (Gale, 2022). The average family household in Florida in 2022 is three persons or more (World Population Review, 2021) thus at least one or more adult consumer(s) resides in these households. According to World Population Review website, the present 2022 Florida population is, apparently, 22,085,563. This factor was derived from government database sources including the Florida Office of Economic & Demographic Research (World Population Review, 2021).

Electronic devices are the No. 1 toy category in American households (Statista, 2022). Dolls and plushies are fourth, toy figures and toy worlds are sixth (at 67% availability for children to play with in household), and musical toys ninth (62%) (Statista, 2022).

How much of each of those Florida's household spending went to purchase Greek-themed toys, apparel, or strikingly similar toys with Greek themes or stories? After watching a Barbie Doll animated tv show or interacting with Mattel's Barbie website, how many parents went and purchased Greek-themed Barbie dolls for their kid(s)? After watching any Greek-themed media, whether it was 'Thor: Love and Thunder', 'Jason and the Argonauts', or another show or movie, or even read a book, about Greek mythology; how many Florida consumers purchased from a Greek branded toy line? Additional research and sampling should provide the empirical data to answer these qualitative, quantitative, and predictability questions.

The cult film ‘Jason and the Argonauts’ (1963) originally saw no toy line, nor much of any merchandising, in its prime. It was not until the new millennia that independent toymakers, small manufacturers, and hobbyists began producing Greek-themed, posable models and toy figurines of the old movie’s characters. ‘Jason and the Argonauts’ wasn’t enough of a commercial success and the American market of the time didn’t need Greek-themed merchandise depicting the film’s characters. The movie may have failed somehow with producers or audiences or taken a monetary loss (if too few people purchased tickets to see the movie) such that it did not call for manufacture, distribution and promotion of a spinoff toy line or similar merchandising. The old film, ‘Jason and the Argonauts’, provides a solid subtext that it does not always follow that a line of toys should be created when a parent product becomes popular at the box office or succeeds commercially. Worldwide, people love Greek stories mythos. Books, of different kinds and sizes, of Greek stories, are sold in bookstores in all developed countries, across Florida and the USA. Greek mythos, including its Pantheon of Greek gods, are near immortal because people keep them alive through their stories and need for models of good education, morals, and human plights that tell us, through stories and mythology, how to endure and survive.

Greek-themed toy may be spun from something as strange as collectible comic books, in modern day consumer gratification purchases in 2022. The “Thor: God of Thunder” comic book line by Marvel Comics is a good example of this. In 2022, Marvel Studios released and distributed its “Thor: Love and Thunder” movie, a spinoff of the Thor graphic novel series. The new movie depicts Zeus (played by union actor Russell Crowe) and Hercules as protagonists of Thor. Yet, Marvel Legends, a Hasbro toy line, had already, long produced and distributed its Hercules posable action figure prior to the 2022 movie. In 2022, the new ‘Doctor Strange: In the Multiverse of Madness’ movie was released and distributed by Marvel Studios. Hasbro’s Marvel Legends includes many new posable action figure models depicting characters from the new Doctor Strange film. One new figure from the movie is a minotaur. The Disney ‘Hercules’ toy line is sold in small shops inside Disney theme parks, and Disney licenses and partners with major brand partners and outlet stores, as it has with TRU in the past, including Walmart, Kmart, Sears, Best Buy and others. These partnerships bring their toy line to mass market for families, parents, kids, and others to buy. The Hasbro Marvel Legends posable figures are sold through Hasbro’s store partners, such as TRU (until its stores closed), Walmart, Best Buy and other reputable stores. Today big name store have internet sites for instant purchases.

The classic film ‘Clash of the Titans’ saw its spinoff toy line. ‘Clash’ saw a resurgence of American society’s need for Greek themed stories depicted in major motion pictures; in 2009 ‘Clash of the Titans’ was rebooted as a new movie and saw a second movie spinoff release. With an Athena posable doll, Mattel's Barbie ‘Gold Label’ toy line includes a Grecian Medusa posable doll (depicting a woman of power) who is fashionable and can 'stun' any man (Raucci, 2009). Mattel's website further describes its Athena Barbie doll as "beautiful and bold ... a fashionable force to be reckoned with" (Raucci, 2009).

Conducting background research, on products depicting Greek mythos, may reveal sales data within toy companies and provide samples for data inferring the size of the target market. Yet, if there's no data available, then that is data we want to find through the methodology (of surveys) (Gilmore, 2022). TRU may further predict and potentially increase Florida consumer sales and revenue at TRU, with our researchers review and survey test.

## Method

### Population

Population: 8,363,888, Floridian, adult consumers.

It is impossible to survey every consumer in Florida, therefore Our research group will pull a sample(s) from said population in order to make claims about the larger group population (Floridian consumers who purchase toys and games) (Croucher & Cron-Mills, 2021). In July 21, 2021, Floridian population was 21,781,187 (U.S. Census Bureau, 2021). According to the U.S. Census Bureau, 80.3% of Florida's population are 18 years of age or older (U.S. Census Bureau, 2021). Thus 17,490,293 Floridians are adults. Still, this population, 17.5 million, is too large for our researchers to survey each adult consumer within the population. As there are far too many Floridians (22+ million in population), it is impossible to know the exact number or consumer purchases in years 2021 and 2022, and there exists no written, singular data stating the population of Florida adult consumers in 2021 and 2022. Adults – including those in Florida families – are commonly known to make purchases. 26.9% (U.S. Census Bureau, 2021) of Florida households have a child resident. Thus, a large number of Florida consumers are residents of family households; a home with child/ren and one or more adult(s) and / or parent(s) residing there. And these data are in part why quota sampling (see below) will be best for our sampling technique.

Sample: 836,389 Floridian adult consumers  Sample to survey: 1,000

### Quota sampling

The sampling technique we will use is quota sampling. The focus of our study are specific groups or portions within our target population (Florida adult consumers with income and who purchase toys and games) not necessarily at the exclusion of other groups (Croucher & Cron-Mills, 2021). Through quota sampling we will only be sampling Florida consumers who purchase toys and games, excluding other kinds of Floridians from our sampling. One of our sample requirements is the adult participants must have an income of $15,000 or greater, a common factor of the Floridian being a consumer who has likely and/or who would make future purchases.

Quota sampling is a nonrandom sampling procedure though it is not the most common technique used by researchers (Croucher & Cron-Mills, 2021). Demographic weighting (Kennedy, 2017) could help reduce bias in selecting our sample from the population for survey testing. Quota sampling is also nonrandom sampling (Croucher & Cron-Mills, 2021). It is how and where our research group predetermine categories and how much data we want in each category (Croucher & Cron-Mills, 2021). We then collect just enough data to fill each category (Croucher & Cron-Mills, 2021). In this kind of sampling, we decided we should only survey those Floridian residents who are; age 18 or older, have income of at least $15,000 or more, who are married or unmarried, who have ever purchased or owns/ed a toy, book or game or whose family member did/has, and who have child/ren or none.

The following demographics of Florida adult consumers are needed, by quota within the population and 10% sample size, to participate in our experiment:

- 150 unmarried women (age 18 or older) with incomes over $15,000, and who have purchased any toy, game or book (collectively referred to as "toy" or "toys") within the past 12 months, and has no children.
- 150 unmarried men (age 18 or older) with $15k+ income, purchased a toy w/i the past 12 months, no children.
- 100 unmarried women (age 18 or older) with $15k+ income, purchased a toy w/i the past 12 months, w/ biological child/ren.
- 100 unmarried men (age 18+) with $15k+ income, purchased a toy w/i the past 12 months, w/ biological child/ren.
- 150 adult spouses (married, residing w/ spouse) with $15k+ income, purchased any toy w/i the past 12 months, and who has no children.
- 150 adult spouses (married, residing with spouse) with $15k+ income, purchased any toy w/i the past 12 months, and who has child/ren.
- 50 single men, w/ or w/o child, who owns/ed any kind of toy, game or book ("toy").
- 50 single women, w/ or w/o child, who owns/ed any kind of toy.
- 50 married men, w/ child, who or whose family member(s) owns/ed any kind of toy.
- 50 married women, w/ child, who or whose family member(s) owns/ed any kind of toy.

With this kind of study design utilizing quota sampling we have determined the sample group (Croucher & Cron-Mills, 2021); Floridian adult consumers, and determined the number of consumers to survey, 1000. According to St. Olaf College, for larger populations, such as a population of 10,000, a comparatively small minimum ratio of 10 percent (1,000) of individuals is required to ensure representativeness of the sample (St. Olaf College, n.d.). A good maximum sample size is usually 10% as long as it does not exceed 1000 (Bisits, n.d.).

Researchers can often understand the entire group with about 1,000 respondents (CloudResearch, 2022). Our study's aim is to measure and describe people's behavior (specific purchases). We recommend following the calculations made for probability sampling which often translates to a sample of about 1,000 or more respondents, to ensure enough number of them actually respond and complete our survey experiment (CloudResearch, 2022). Ideally, the quotas chosen would proportionally represent the characteristics of the underlying population (Health Knowledge, n.d.).

<u>Sample to survey based on quota sampling: 1,000</u>

**Recruitment of participants**

How will our research group recruit respondents to participate in completing each part of the experiment? To recruit participants to our one-group pretest posttest study (see below), we will:
1. Send out a massive email blast to each person in our sample group,
2. Mail out full descriptive brochures to each person in our sample group, and
3. Our researchers will call by phone each person in our sample group.

The brochure mailed, the emails, and our communication during phone messages to and talking with our sample, will state that our study / research group are paying participants above minimum wage to voluntarily participate in and complete our two-survey / interaction study (Croucher & Cron-Mills, 2021).

**Methods of completion of surveys and one-group pretest posttest**

Surveys

The principal instrument for collecting data in surveys is the questionnaire (Choi & Pak, 2004).

In Month 1 (see below), our survey questions, shown below, should be completed online via an easy-to-type website link provided to each participant. Participants who wish to complete their surveys by mail may call or write to us and we will gladly mail and also email requesting participants a mail-in, printed (and printable) survey for completion. For disabled persons, we offer reasonable accommodations to help the surveys. And we offer all print types, the participant can even call us to complete survey by phone, if necessary. However, modern day people - including most Floridians - commonly have access to computers and internet. Completing surveys online, via a website such as SurveyMonkey, is more efficient and less expensive. Thus, the primary and most efficient method for completing the survey will be online using a link / webpage where the survey is located digitally.

Independent variable, boxed product

In Month 2 (see below) of our study, participants will be shipped a packed, deliverable box which will have our independent variable within. The box will include Greek themed toys, books and games.

**Month 1: Pretest, survey and questions**

SURVEY 1
Answer all of the following questions and then click Submit to complete the entire survey. If you are mailing in or emailing your survey back to us, if needed - you can use additional sheets of paper to answer descriptive survey questions. If you need to complete your survey by phone, please give us a phone call.

1. What is your age?
2. How many people in your family? Do you all reside at the same residence?
3. What was your total income in year 2022?
4. Did you purchase any kind of toy in the year 2022? If so, which toy?
5. What was the cost of the toy(s) you purchased. Describe each?
6. In 2022, did you purchase any Greek themed product (not including food items), especially any games, toys, and books?
7. What was the cost of each Greek themed product you purchased?
8. In 2022, did you purchase any games of any kind? If so, which game(s)?
9. What was the cost of the games you purchased? Describe each.
10. In 2022, did you purchase any reading materials of any kind? If so, which reading materials?
11. What was the cost of the books or reading materials you purchased? Describe each.
12. What are you looking for when purchasing toys, models, collectibles, dolls or similar?
13. What are you looking for when you purchase games such as a board game and a video game?
14. What are you looking for when you purchase a book such as an adult reader book and a

storybook for a kid?

15. To what extent do you believe Greek-themed toys, including educational books, figurines and dolls, clothing apparel, and similar Greek-themed toys, are good for fun and education?
16. Is your firstborn child male or female?
17. What county of Florida do you reside in?
18. Describe the feelings you have about popular Greek stories.
    a. Dissatisfied
    b. Unhappy
    c. OK
    d. Happy
    e. Satisfied
19. How much income would you need to justify purchase of a toy, education product, or game?
20. What would cause you to purchase from a toy line of Greek-themed toys?
21. To what extent do you buy toys for your children, related kin, friends, coworkers?
22. To what extent do you buy toys, games and books for yourself, your friends and family?
23. What was your expense in year 2022; how much money did you spend on toys, games, and books in all?
24. On average, how much money do you spend on toys, games, reading material per year in the last ten years?
25. To what extent do you have control over the educational, breaktime and other reading materials you and your family read in public, private and home studies?
26. Are you more influenced to purchase a toy if its toy line is attached to and depicts a popular movie, tv show, and / or reading material(s) in all?
27. How many hours per month does you play with toys, games and read books about any history (include any depiction of Greek mythos or history, social domestication and military)?
    0-2 hours
    2-4 hours
    4-6 hours
    More than 6 hours
28. Have you ever played with or seen any Greek-themed product (e.g., Hercules, Greek dolls or figures, posters, storybooks, figurines or dolls, games, other)?
29. What Greek-themed movie or show would you like to watch most, and what Greek-themed movie or show would you like to watch least? State whether each media has purchasable toys affiliated with it.
30. What Greek-themed products (e.g., toys, games, storybooks) would you be interested in seeing yourself, your family and friends roleplay and learn with?
31. How many people do you know who purchased any Greek themed product?
32. From Question 31; what did they purchase?
33. Would you consider wearing a vegan Golden Fleece in cosplay / roleplay with family and friends?
34. What about a full, toy Golden Fleece apparel interests you?
35. Which board games and video games do you and your family play?
36. Have you ever played any Greek themed video games?
37. Which of these toys do you believe you, and your family, would like to play with most? (Choose three from the list by circling.)

- Toy sword (foam).

- Toy sword (plastic).
- Toy shield (Grecian themed).
- Toy, vegan 'Golden Fleece' with cosplay ram's head and horns.
- Poseable dolls, for dress-up and roleplay, depicting Greek mythos characters.
- Poseable action figures, with toy swords and shields, depicting Greek mythos characters including heroes and pantheon of gods.
- Greek toga t-shirt.
- Poseable action figure of the hero Jason, of the Argonauts.
- Poseable action figure of Artemis, goddess of the hunt.
- Flags depicting Greek-themed colors, logos and characters.
- Greek-themed, fully playable, toy drum and banging sticks.

38. From Question 37 above, list each circled toy, rank each in # from most liked (1) to least (3).
39. Which of these Greek characters do you most see yourself, your family members, and your friends roleplaying as ? (Next to the character you see yourself as write 'self'. Next to the character you see your family member as write the member (e.g., 'dad'), and friends.

- Hera, goddess of women, family, almighty.
- Athena, goddess of war and handicraft.
- Aphrodite, goddess of beauty and love.
- Medusa, mysterious, triumph of one's foes.
- Themis, goddess of justice and culture.
- Zeus. god of the sky and thunder.
- Poseidon, god of the oceans and water.
- Demeter, goddess of harvest & fertile earth.
- Hestia, goddess of hearth & state.
- Apollo, god of the sun, archery & truth.
- Artemis, goddess of the hunt.
- Charon, lord of River Styx, Gatekeeper.
- Hades, father of earth, god of underworld.
- Hephaestus, god of architecture, tech & fire.
- Ares, god of war.
- Dionysus, god of cults, wine & festivities.
- Hermes, herald of gods, god of messages.
- Daedalus, the wise, labyrinth maker.
- Atalanta, heroine, swift-footed huntress.
- Helen, most beautiful, Zeus' daughter.
- Antigone, headstrong, faithful, war proven.
- Jason, hero, Argos leader, Golden Fleece.
- Perseus, hero, slayer of monsters.
- Hercules, hero of strength & good morals.
- Kraken, mysterious, hiding under the ocean.
- Succubus, creature, sucks life out of victims.
- Centaur, hero, half horse/half human.
- Satyr, prankster, half human / half goat.
- Dragon, awesome, burning & pillaging.
- Minotaur, stoic creature, half man / bull.

40. From Question 39 above, describe what would cause you to purchase a toy, game, or storybook depicting one or more of the characters you chose; for yourself, your family, and your friends?
41. In the next part of our study you will receive a boxed set of toys and products. The box will contain instructions advising you to remember your interactions with the products. You must complete the instructions to move to the final survey. Do you understand these instructions?

**Month 2: Independent Variable, Exposure**

Our research group will mail each participant, who completed the first survey in Month 1 and sent it back to us, a full box of Greek themed toys (includes books and games) mentioned in the Month 1 Survey. This box of test goods will include; 30 different, posable figurines / dolls depicting each of the Greek themed characters listed in the Month 1 survey, two games; a Greek themed board game, and a small video game app – playable Greek themed story - for use on pc desktop computers and mobile / smart phones, and three Greek themed storybooks with interior illustrations. This will effectively exposure our respondents to the entire independent variable. The box will contain a set of written instructions which state:

INSTRUCTIONS

As you are interacting and roleplaying with your new Greek themed toy figurines, apparel, games, books and other, think about your interactions and experiences with the products. Try to describe the use to yourself. Our survey in Month 3 will ask you to describe your experiences, thoughts and feelings in working with and using the free Greek themed products you received here.

**Month 3. Posttest, Survey**

SURVEY 2

Posttest survey must be completed by participants who must send completed surveys back to our group by email or mail. Participants who completed both surveys, and successfully returned the surveys to us, will then after be paid in Month 4.Survey 2 appears identical to Survey 1 from Month 1 above, except that Survey 2 will include the following additional, descriptive questions:

A. Describe your feelings in interacting with each of the Greek themed toys.
B. Did you role play with each of the toys?
C. Of your three favorite Greek characters, describe in detail what you like most and what you like least about each of the figurines? Do you like the tiny plastic weapons, changeable apparel, and pose-ability of the figures? Be as descriptive of each figure / doll as possible.
D. Describe your thoughts in interacting with each of the Greek themed toys.
E. Describe your interactions, thoughts and feelings in using the Greek themed board game.
F. Of the musical and other toys included, describe your level of enjoyment with each of those.
G. Did you enjoy wearing the Golden Fleece clothing apparel? Describe your experience.
H. Of the Greek story books included, which is your favorite? Describe in detail here why this one is your favorite. Describe in detail what you liked least about the other two books.
I. Would you recommend purchase of the books to your family, friends and others you know? If so, explain why. If not, explain why not.
J. Would you recommend purchase of the toy figurine line to your family, friends and others you know? If so, explain why. If not, explain why not. For all answers here, describe your answers.
K. Of the additional toys and the games provided to you, would you recommend purchase to your family, friends and others you know? Explain why and/or why not.

**Timeline of One-group Pretest Posttest**

Month 1. February 2023

Completion of Survey 1 (the pretest) by participants by end of Month 1.

Month 2. March 2023

Interaction. Exposure of entire line of Greek themed toys including figurines, clothing apparel, toy musical instruments, storybooks, and two games. Send out Survey 2.

Month 3. April 2023

Survey 2 (posttest) completed by participants and sent back before end of Month 3.

Month 4. May 2023

Payment to participants for completing Survey 1, Interaction, and Survey 2.

Month 5. June 2023

Our researchers will analyze the data collected in our sample participants' surveys.
